

CUSTOM DESIGNED & MANUFACTURED INDUSTRIAL HEAT EXCHANGERS

Serving the Chemical, Food, Mining, Institutional, Pulp and Paper Industries

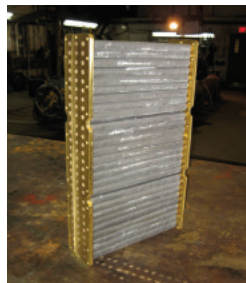

Shell & Tube

- manufacturing many different models such as BEU, BKU, NEN, AEL and more
- evaporators, condensers, tube bundle complete construction & re-tubing, heat exchangers with floating head, TEMA nomenclature configuration
- stainless steel, steel (304L or 306L), copper, copper nickel alloys, monel, titanium and more
- process control, energy recuperation and tank heating applications

Wide Range of Unit Heaters

- high quality industrial type with CRN
- diffusion: lovers, open face, convergent
- extruded aluminum finned tubes
- 16 ga. minimum casing
- quality motor-ventilator unit

Heavy Machinery Equipment Coolers

- industrial quality construction
- steel tank and structure
- thick tubes
- extruded aluminum finned tubes

Finned Tube Coils

- superior quality finned tubes, mechanical extrusion of aluminum fins
- high thermal efficiency
- very resistant and suitable for all applications
- casing: stainless steel, steel (304L or 316L), galvanized steel
- headers/nozzels: stainless steel, steel (304L or 316L), other
- air conditioning: unit heaters for steam, hot water, glycol or dehumidification units for cold water, refrigerant and more

Designing and manufacturing options for the following applications:

Process Control, Energy Recuperation, Tank Heating, Factory, Corrosive and Dusty Environments Compressor Oil Coolers, Hydraulic Systems, Forestry and Mining Machinery

Proudly Canadian

T. H. Industrial Solutions

Proudly Represents These Industry Leaders

Industrial Heat
Exchangers Manufacturer

Butterfly Valves
Actuators Ball Valves

Bag Filter Housings
Magnets

INSTRUMENTS

Gauges
Pressure Sensors

Indexing Filters
Bag Filters

Sand Filtration
Separator Filtration Disc Filtration

Custom Rare Earth
Magnets

Plate Heat Exchanger Service
Shell and Tube Service

Plate & Frame Shell & Tube
Cleaning / Testing / Regasketing

Health & Safety Accreditations
